ATTACHMENT S

Mail Station: L-703

Extension: 4-6897

Interoffice Memorandum

TO: Ray Mariella Jr. L-222

FROM: Eddie Scott

SUBJECT: IL-10560 Patent Application Draft
"Detection and Elimination of Chemical and Biological Agents"

RECEIVED
MAR 19 2002
TC 1700

Enclosed is a copy of the final patent application for IL-10560 "*Detection and Elimination of Chemical and Biological Agents*." Even though this is intended to be the final version, if you see something that needs to be changed, let me know; and we will make the changes before you sign the application.

Also enclosed are two different forms that you need to sign and date: "Combined Declaration and Power of Attorney" and "Assignment."

The "Assignment" assigns your rights in the invention to the University of California. The "Combined Declaration and Power of Attorney" states that you are the inventor and gives me and the other named University of California attorneys the power to act on your behalf.

Please return these signed forms to me. Call if you have any questions.

Eddie Scott
Assistant Laboratory Counsel
